EXPERIENCE

SOC Analyst

June 2026–August 2026

Knowledge Mine Info Media

- Conducted proactive threat hunts by correlating external OSINT indicators with internal firewall logs; investigated IAM anomalies and phishing campaigns and documented findings using MITRE ATT&CK for Tier 2 escalation.
- Supported enterprise GRC initiatives and NIST SP 800-53 compliance audits, prepared risk-management documentation, and ran automated VAPT scans to prioritize remediation.
- Executed malware tabletop simulations and incident-response playbooks for host isolation, helping formalize end-to-end security-event workflows.

Product Development Intern

June 2025–August 2025

SYNIRIS Technologies

- Developed centralized role-based authentication workflows, reducing administrative onboarding and configuration time by 35%.
- Led PASTA threat-modeling sessions that surfaced 12+ potential attack vectors early in design and reduced post-deployment application-security defects by 40%.

Project Trainee Intern

June 2024–August 2024

ARC SOLUTIONS

- Built Sentinel-1 SAR data-processing workflows in Google Earth Engine for large-scale environmental mapping and produced technical implementation reports.

PROJECTS

Faultplane

- Built an automated threat-intelligence platform that aggregates 10+ authoritative security sources, enriches vulnerabilities through NVD and CISA KEV, generates executive summaries, and publishes daily through GitHub Actions.
- **Technologies:** Python, Groq API, GitHub Actions, NVD 2.0, CISA KEV

LedgerCast

- Developed a packaged CLI and client-side dashboard for testing access management, change management, backup and recovery, and segregation-of-duties controls, with findings management and framework crosswalking.
- **Technologies:** Python, ITGC / SOX, ISO 27001, NIST CSF 2.0, COBIT 2019

PolicyForge

- Built an information-security governance suite with eight security policies, numbered safeguards, control-to-framework traceability, and exception/review registers mapped across major security and privacy frameworks.
- **Technologies:** Security Governance, Policy Engineering, Control Traceability, ISO 27001, NIST CSF 2.0, DPDP Act 2023

Agentic IaC Vulnerability Detection & Remediation

- Built an automated DevSecOps workflow that detects Infrastructure-as-Code security misconfigurations, generates remediated configurations, and validates proposed fixes with Checkov before presenting results.
- **Technologies:** Python, Terraform, Docker, Checkov, LLM Workflows, Streamlit

SKILLS

- **SOC & Detection:** Threat Hunting, Alert Triage, Log Analysis & Correlation, Incident Response, Phishing Investigation, Malware Triage, IAM Investigation, Vulnerability Management, MITRE ATT&CK, IoC Analysis
- **Security Operations:** Microsoft Sentinel, SentinelOne, Splunk, ELK Stack, Wazuh, Zeek, Suricata, Sysmon, Wireshark, Nmap, Nessus
- **GRC & Risk:** NIST SP 800-53, NIST CSF 2.0, ISO 27001, ISO 27701, COBIT 2019, DPDP Act 2023, ITGC / SOX Control Testing, Risk Assessment, Control Mapping, Audit Evidence, Security Governance, ServiceNow GRC / IRM
- **Application & Cloud Security:** IAM, RBAC, PASTA Threat Modeling, VAPT, Burp Suite, Metasploit, Checkov, Azure Security, AWS Security, Active Directory, Docker, Terraform, CI/CD
- **Forensics & Security Research:** Autopsy, Volatility, Ghidra, OSINT, CVE Analysis, NVD 2.0, CISA KEV, Threat Intelligence, Technical Security Research
- **Programming & Infrastructure:** Python, Bash, PowerShell, SQL, JavaScript, C/C++, Git, GitHub Actions, Linux, Windows Server, TCP/IP

EDUCATION & CREDENTIALS

B.Tech in Computer Science & IT — Cyber Security, Symbiosis Skills and Professional University

2023–2027

CREST CTF Competition — Top 10

Certified SME Cyber Security Officer (CSCSO)

ISO 27701 Lead Auditor — Mastermind Assurance

Ethical Hacker — Cisco Networking Academy

Microsoft Security Operations Analyst (SC-200) Expected November 2026
